

## SEAL FOR USE WITH MEDICAL DEVICE AND SYSTEM

### Abstract of the Disclosure

A seal adapted for use with medical devices is provided. The medical  
5 device may be a lead having a distal tip adapted for implantation on or about the  
heart and for connection to a system for monitoring or stimulating cardiac activity.  
The lead assembly in one embodiment includes an atraumatic tip. A seal is  
provided within the lead tip assembly, which prevents or limits further entry of  
fluids through the lead tip. The lead may be a left ventricular lead with a  
10 hemostasis mechanism provided therewithin.
